On the 18th of July the total eclipse of the sun will give an opportunity for determining the longitude of the coast of North America, such as will not occur again for many years. The determination of longitude by means of this observation is second only in accuracy to the telegraph method, from which so much was expected in case the Atlantic Cable had been successful. The path of the total eclipse will be ensutward from the mouth of the Columbia River, across Hudson's Bay, leaving this continent at Cape Chidley, the north-eastern point of Labrador. It then crosses the Atlantic, Spain, and Algeria, and passing to the south of Tripoli, leaves the carth at Massowa, on the Red Sea. The Astronomer Royal of England, the Bayarian Astronomer, and several corps of French observers, will watch the eclipse in Spain and Algeria. Nearly a hundred observers will be stationed along the path of the eclipse there. The Superintendent of the Coast Survey will provide for observations on the coast of Oregon. Needlework Artistically Considered.

Needle work is thus gracefully eulogis by Nathaniel Hawthorne, in The Marble

Form:

"There is something extremely pleasant, and even touching—at least, of very sweet, soft, and winning effect—in this peculiarity of needle-work, distinguishing men from women. Our own sex is incapable of any such by-play aside from the main business of life; but women—be they of what carthly rank they may, however gifted with intellect or genius, or endowed with awful beauty—have always some little handiwork ready to to fill up the tiny gap of every vacant moment. Hon, Edward Ewerett is now sixty-six

A needle is familliar to the fingers of them all. A queen no doubt, plies it on occasions; the woman-poet can use it as adroitly as her pen; the woman's eye that has discovered a new star, turns from its glory to send the polished little instrument gleaming along the hem of her kerchief, or to darn a casual fray in her dress. And they have the adventee of her kerchief, or to darn a casual fray in her dress. And they have the advantage of us in this respect. The slender thread of silk or cotton keeps them united with the small familiar, gentle interests of life, the continually operating influences of which do so much for the health of the character, and carry off what would otherwise be a dangerous accumulation of morbid sensibility. A vast deal of human sympathy runs along this electric line, stretching from the threne to to the wicker chair of the humblest seamstress, and keeping high and low in a species of communion with their kindred beings. Methinks it is a token of healthy and gentle characteristics, when women of accomplishments and high thoughts love to sew, especially as they are never more at home with their own hearts than when so occupied.

ENORMOUS PROFITS OF INDIA RUBBER MANUFACTURANTS.—In the trial of a case at New York, last week, the evidence developed the enormous profits made by ludia Rubber Manufacturers. By way of illustration, it was proved that the entire cost of a pair of India Rubber shoes, made by the Ford Rubber Company, was only nineteen cents, (they usually retail for \$1,) that the Ford Rubber Company's stock, whose par value was \$100, is now worth \$300 a share, and has always paid over thirty per cent. per annum on its capital, and that the North British Rubber Company, established in Edinburg by the defendants, paid a dividend of £30 in January, and another of £30 in July of the same year, on a share nominally of £100, but on which only £50 were paid up, or a net profit of one hundred per cent!

MIRACULOUS ESCAPE PROM A LOCOMOTIVE Tracedy.—A few days ago, John Kuhns, in attempting to cross the track of the Pennsyl-vania Railroad, at Manor Station, with a twovania Railroad, at Manor Station, with a two-horse wagon, made a very narrow escape from sudden death. Just as his horse had stepped upon the track, a locomotive came themer-ing down on him. The horses got over the track, but the locomotive struck the wagon amidships, and knocked it clear off the track, turning it upside down. The horses broke loose and ran with the fore part of the wagon about half a mile; while Mr. Kuhne stuck to the vehicle, and he was found very snugly en-scounced under the wagon bed, entirely un-hurt.

SERIOUS MISTAKE OF A PRO-RLAVERY PUBLISHER.—The junior proprietor of the Boston Courier, says the Traceller, was pretty essentially sold last Sunday. After being seated in church with his family, the sexton took the liberty to put in the pew in front, a young lady whose skin was not of a pure Saxon white. The gentleman, irragining her to be of the proscribed race, left the church with his family in high dudgeon. The lady, however, proved to be the daughter of a rich Cuban planter, and a slaveholder. The chagrin of the young man can better be imagined than described, when the truth was made known to him. The act was intended by the sexton as a compliment, knowing the gentleman's proclivities and his connection with the leading organ of the slaveholders in New England. The Ottown and Prescott Railway have contracted to transport over their line the Ohio stone to be used in the Canada government buildings at Ottowa.

Whitney was lost, as we have mentioned, from his wherry while rowing on Charles River, near Boston, a small spaniel belonging to him has regularly visited the boat-house and expressed the deepest anxiety for his master's absence. When the boat was within his reach, he jumped into it, and licked the oars, the stretcher and the seat, all the time sending up a places are search. A young woman in Nahsua, N. A Woman Poisoned to Death by the use of Tallow.—A daughter of Mr. Meredith, who resides near Ludlow, England, recently met her death from the following incident: Returning from Ludlow, and finding her lip much chapped from the wind, she applied some tallow to it, which is supposed to have contained some poisonous matter or fat that had been much decomposed. RECIPE FOR LEMMON PIE. - Make nice paste, REGIPH FOR LEMMON PIR.—Make nice paste, and lay into two medium sized plates; then prepare the following mixture: To the juice and grated rind of one lemmon, made very sweet with sugar, add three well beaten eggs, and a piece of butter half the size of an egg, melted. Stir these ingredients together, then add a pint of rich milk, or thin oream, stirring very fast. Fill the plates and bake immediately.

DEATH OF A VENERABLE SOLDIER.—Captain William Beatie, the oldest man perhaps in South-western Virginia, died a few days since. Captain Beatie was about one hundred years old, and was the last survivor of the King's Mountain veterans from Virginia.

GRAND FIRE SCENES.—The mountains on fire for many miles along the line of the Virginia and Tennessee Railroad, present to the traveler at night a beautiful, and at the same time, grand and majestic appearance, which defies description.

MILITARY MARBIAGE -In Tenshaw County, Indians, a couple were recently married b the commandant of a fort in that vicinity There was no minister present, and the couple thought that as the captain had been placed there by the government as a general protec-tor and regulator of affairs, he had a right to the authority he assumed.

BUBINESS ON THE SOUTHERN RAILROADS .-business of the Southeau Alliedans.—A train of forty-three cars left the depot of the Norfolk and Petersburg Railroad, at Norfolk, Va., Tuesday morning. Each car was heavily laden with merchandize, and seventeen were filled with goods for Tennessee, which go "through" without breaking bulk.

ARBIVAL OF AN OLD HUSTER AND HIS CAPTIVES.—Old Adams, the great California hunter, with one hundred and fifty living animals of his own capturing, including seventeen dancing and performing bears, has arrived at New York from San Francisco, on board the ship Golden Fleece. George Wilkins Kendall writes from Texas to the New Orleans Picogone, that he is the owner of 1,200 lambs, and expects in three weeks to own 1,800.

Desperate Fight Between a Musk Rat and a Moccasin Snake.

A remarkable and exciting contest took place recently near Petersburg. Va., says the Express, between a musk rat and a powerful moccasin snake. The "difficulty" occurred in an old lee pond, and originated while the musk rat was taking a quiet swim across the pond. When encountering the moccasin about half way, be grossly insulted him by wheeling shortly around and evincing his repulsion by diving for shore. The snake being the better swimmer, overtook him just as he reached the bank, nabbed him by the snoul, and commenced a rapid series of evolutions to puzzle his legs, and envelope his body. The musk rat struggled violently, and fought with desperation for ten minutes, rolling, tumbling, biting, scratching and scrambling, first on the bank and then in the water, while the moccasin held firmly, tightening his folds gradually, and seeming perfectly at ease in his manouvres. The musk rat at length surrendered, and falling over upon his back, was gasping convulsively, when a stone thrown from a witness of the contest, caused the moccasin to release his hold and retreat acoss the pond. MYSTERIOUS AND ROMANTIC DISAPPEAR ANCE IN THE SOUTH. - A case of mys ANCE IN THE SOUTH.—A case of mysterious disappearance, writes the New Orleans correspondent of the St. Louis Republican, occurred a few days ago, and has excited a great deal of interest among persons cognizant of the facts. One morning recently a boy presented himself at the door with a large and splendid bonquet, which he said was for Miss Emily, and immediately went way. said was for Miss Emily, and immediately went away. The sequel seems to prove that she knew who the bouquet came from, and that it contained a note appointing a meeting, for not long afterward she made an excuse to go out, and did not return. Alarmed at her absence, inquiries were made in every direction by the family, and it was finally ascertained that she had gone on board the afternoon mail boat for Mobile in company with a young man well known to her friends.

THE STYLE OF MAN POTTER IS .- The Washington correspondent of the Philadelphia

Press says:

Mr. Potter is one of the boldest men in the House. He represents the Milwaukie, Wisconsin, district, which is one of the most intelligent and populous in the Union. This is his second Congress. You remember his appearance in the affray which took place between Mr. Grow and Mr. Keitt during the discussion of the Lecompton question at the first session of the last Congress, in which he displayed great coolness and courage. He is about forty years of age, of fine, noble presence, with heavy light gray beard, and a muscular development which shows him to be equal to great endurance.

THE DISCOVERY OF ELECTRICITY.—It is stated in the "Tablet of Memory." that the first idea of electricity was obtained by two globes of brimstone, 1467. Electric sparks scovered at Leyden, 1746; first known it ould fire spirits, 1756. Centuries before the development of the

Centuries before the development of the science of electricity, the ancionts were acquainted with the effects of the torpedo, which is nothing more nor less than a living battery. Thus Pliny in his Natural History, published A. D. 77, says: "The torpedo is very well aware of the extent of its own powers, and that, too, although it experiences no benumbing effects from itself. Lying concealed in the mud, it awaits the approach of the fish, and at the moment they are swimming above in supposed security, communicates the shock, and instantly darts upon them."

A TEHRIBLE SEQUEL TO A MARRIAGE BY AD-VERTISEMENT.—A beautiful but silly girl, of sixteen to eighteen years, daughter of a widow of Rockford, Ill., advertised for a husband in the paper for the romance of the thing, and was caught and seduced by a Pike's Peak gambler named Wm. Moore. She started in company with him for Pike's Peak, and now has been found murdered on the way at Ottumwa, Iowa.

A Propertable Grape Vine.—A rather large story is told by an exchange, to the effect that a woman in the county of Santa Barbara, California, has one grape-vine which, in a single year, hore 5,000 bunches of grapes yielding \$4,000. When a girl, on leaving Monterey for her present home, she picked up a vine-cutting to drive her mule. This cutting she planted on her arrival, and after a lapse of seven years the foregoing is the result.

FATAL RAILWAY ACCIDENT.—A train on the St. Louis, Alton and Chicago Railroad ran off a treatle bridge, from which a rail had been removed, on Thursday night, into a raying thirty feet depth. No passengers were injured; but on clearing the wreck the crushed bodies of two young men were found between the tender and the baggage car, where, it is supposed, they had been secretly taking a ride on the platform.

A Mother Counidate the Sedecer of the Daughter.—On Thursday evening, at Woburn, Mass., an indignant mother, whose feelings had been outraged beyond endurance by a worthless fellow, a carpenter by trade, who had betrayed her daughter, took the law into her own hands, and administered to him a severe cowhiding.

AN IMMENSE NUMBER OF FERROR BONDS ON THE MARKET.—The French railways are ex-pected to throw on the stock market this year \$100,000,000 of new bonds to enable them to execute the works the government obliges them to complete; the transformed Credit Mobilier is to aid them in the negotia-sitou. What tuns of paper must be floating on the Paris Change.

Supposed Rossenv and Murder,—A man named D. Kauffman, of Darke County, Ohio, mysteriously disappeared from Lima a few days ago. He was expecting a large remit-tance of money, and it is feared he received it and was decoyed to some out-of-the-way place and murdered and robbed.

The sable General at length began to ex The salor ventural religious toward the fair hibit a degree of coldness toward the fair Englishwoman, which indicated that he was getting tired of his fair inamorate. About this time the landlord himself made some im-proper advances toward the widow, as she niproper advances toward the widow, as sheulleged, and was repulsed. This made the Frenchman revengeful. He determined to get rid of her ladyship, especially as he began to suspect that she could not, and her black lover would not pay her bill. Accordingly a rival was introduced to the General in the shape of a charming Parisian lady, The bait took. One morning the Engilsh widow went to the door of the General's apartment, and, to her extreme horror and disgust, she saw the illustrious exile from the Haytian Empire mon his couch, in soft dal-Haytian Empire upon his couch, in soft dal-liance with her French rival. This was too much for her weak nerves and she retired from the battle-field, leaving her rival misress of the position.

Amusing Scenes at an Express Co.'s Sale. Once a year Adams's Express Company disposes of unclaimed packages at auction. The sales are always largely attended, and there is always a great deal of interest and amusement for the spectators, arising from the fact that, when the packages are put up for sale, unopened, the bidder is totally in the dark as to what he is really bidding on. A yearly sale was commenced in New York on Tuesday. The bidding was brisk, and the fun was continuous. Boxes, bags, and a great variety of parcels were sold at prices ranging from fifty cents to \$22, and the purchasers remained in hope and fear, in relation to the value of these bargains, until four P. M., when the sale closed for the day, and the packages were delivered. The delivery created great excitement. A number of packages were opened, and whenever one proved to be of less value than its purchaser had fondly hoped for, the owner came in for a storm of jokes and mock sympathy, which, however they may have effected the speculator, created unbounded mirth among the bystanders.

The trowsers are of red cloth, made wide, with plaited folds reaching down below the knee, where they are "tucked" up. Below this each man wears a set of leather leggings, reaching to the ankle, with white over-gaiters over the shoes. The neck is perfectly bare, with no sign of a skirt. Each man wore his hair cropped short and his moustache turned up at the corners. The officers wear blue frock coats, red caps with gold trimmings, and satin vests.

GASCONADE OF A GEORGIA FIRE-EATER .-- The "black-list" editor of the Atlanta (Ga.) South-ern Confederacy, having returned from his late tour of speculation to the North, invokes the control speculation to the North, invokes the spirit of those who agree with him as follows:—Let our citizens make an example of about forty of the ringleaders that infest this community by a general gibbiting from the railroad bridge. It is unnecessary to creet a gallows, but swing them like dogs from the most convenient place. When the time for action comes we can point them out, and in necessary will adjust the grapevine. We are opposed to hanging an Abolitionist with a rope; we prefer something that is indigenous to the soil of the country. Hence we suggest a tough grapevine. The abolition and incendiary scoundrels must be driven from this city very soon, or else assessination and murder will be the consequence. He that hath ears to hear let him hear, and he that hath eyes to see let him see.

A Painfully "Religious" Consout.—One Pierce Kitchen was sued in Philadelphia, recently, on charge of beating his wife, but she could make cash to no personal violence. He defended his own cause, and acknowledged that he had sworn at her, but thus pleaded justification: "Mrs. Kitchen, gentlemen of the jury, is a church member. Mrs. Kitchen forsakes her kitchen and spends her time in the church lecture room. While my breeches are running to seed, and the children going round with ill kept noses and dilapidated extremities, Mrs. Kitchen is indulging in conflab with a lot of old ladies about the shocking nudity of the South Sea Islanders. While willing to provide for her, gentlemen of the jury, I ain't willing to feed all the brethren of the church, nor to give bohea parties to twenty people twice a week, neither." The jury acquitted him without leaving their seats. A PAINFULLY "RELIGIOUS" CONSORT .- On

the following is an extract from his letter:

"I shall offend in like manner no more, the imprudencies of the party, which have fallen chiefly on my shoulders in this State for the last twenty years, and which have placed me in the position of being foresset in every fight, and hindmost at every feast, I cheerfully and gladly resign to any one of the numerous well-qualified persons who may desire to occupy it; henceforth the hard fighting of the party will have to be done, and the heavy blows of the Damooracy will have to be received, by somebody also, who may relish and enjoy it (if thay do not profit by it) more than I have done.
